

Topic: Animal Enclosures

What I should already know

- Scissors can be used to cut materials, e.g. paper, card, string.
- We draw our designs before we make our products.

Key Knowledge

What are animal enclosures?

- Enclosures are areas that animals are kept in when they are not in the wild.
- Some animals live in zoos or wildlife parks, and they need an enclosure to keep them, and others, safe.
- It is important for their enclosures to be as natural as possible.
- Enclosures need to be large enough for exercise and to provide some shelter.
- They also need enrichment - things for animals to do.

Vocabulary

Designing	Making or drawing a plan
Evaluating	Saying what you like / don't like
Structure	Something made from different parts
Stiffen	Make it stronger
Design criteria	List of things to include in the design
Measure	To find out the size or amount of something
Improve	To make something better
