

## Topic: Alien Hand Puppets

### What I should already know

- You can join material together by using glue and tape.
- To make a product in DT we design it first.

### Key Knowledge

#### What is a puppet?

Puppets are found all around the world and are used as a form of entertainment. There are many different types of puppets including:

**Hand puppets** are usually made of fabric and cover the whole hand and sometimes part of the arm

**Finger puppets** are usually small and made of fabric. They are worn on the finger.

**Shadow puppets** are a very old form of puppetry and come from China. They cast a shadow on a screen and are usually used to tell a story.

**Marionettes** are made from a variety of materials including fabric and wood and have strings attached to the arms and legs to make them move.
